1 Introduction() To use a section use a command /Section

Please note that the first paragraph of a section or subsection is not indented. The first paragraph that follows a table, figure, equation etc. does not need an indent, either.(you can paste the content)

Subsequent paragraphs, however, are indented.

1.1 Goals of this Research (goals of the project)

Specify exactly your aims of this paper. Also, write a sentence how you will address for each individual goal.

1.2 This is another subsection

Write something related to your paper.

We can use a sub-subsection too. But usually we don't prefer super-childing!

2 Mobile Usability

Displayed equations are centered and set on a separate line.

$$x + y = z \tag{1}$$

Please try to avoid rasterized images for line-art diagrams and schemas. Whenever possible, use vector graphics instead (see Fig. 1).

Theorem 1. *This is a sample theorem. The run-in heading is set in bold, while the following text appears in italics. Definitions, lemmas, propositions, and corollaries are styled the same way.*
